

ALLEN WELCH

Atlanta, GA

Full Stack Developer with a background in research and online education. Always growing, always learning. Experienced in multiple tech stacks and proficient in both frontend and backend languages. Detailed-oriented and committed to developing creative and efficient solutions through the use of technology and team collaboration.

Technical Skills

Java, Spring Boot, JavaScript, ReactJS, Node.js, Express, GraphQL, GitHub, Heroku, Google Cloud Platform, Kubernetes, Terraform, Grafana, Google Analytics, HTML5, CSS3, SASS, LESS, Antd...

Professional Projects

CXO | Java, ReactJS, GraphQL, GitHub Action, Spinnaker, GCP/GKE, Terraform
The Home Depot - Customer Experience Orchestration

- Designed and developed multiple application services for both Contact Center Technology teams as well as the enterprise wide Customer Experience organization
- Monitored and resolved any securities concerns reported by the Cyber Security team or embedded security scanning tools.
- Collaborated with Site Reliability Engineering teams to develop and optimize kubernetes infrastructure, application monitoring, and alerting for all applications
- **Customer Note Service:** provided Contact Center teams the capability to apply customer related notes directly into the customer's Salesforce account
- **Order Cancellation Service:** provided Contact Center teams an orchestration layer to implement self service order cancellations
- **Return Shipping Service:** migrated from legacy application with enhancements to provide additional data and allow THD email communications to retrieve persisted data
- **Customer Search Service:** provided complete service to retrieve data from multiple apis within customer record and loyalty information

HOME | ReactJS, Java, GraphQL, Concourse, TeamCity, Google Analytics
The Home Depot - Home Depot Order Management Experience - Contact Center Application

- Created various components allowing for order modification, cancellation, reorders, etc.
- Coded UIs using ReactJS, Redux, SASS, LESS, Pallet, Antd, and Google Analytics.
- Coded APIs using Java, Spring Boot, and GraphQL.
- Developed unit tests for both UIs and APIs and ensured proper test coverage.
- Integrated HOME functionality into CRM (SalesForce) for enhanced fraud reporting.
- Resolved potential security vulnerabilities as reported by the Cyber Security team.

Experience

The Home Depot - Atlanta, GA | June 2019 – present
